## Social compliance

We monitor the social compliance of our suppliers via our membership of Amfori-BSCI. This gives us the possibility to conduct third party, independent audits within a reliable framework. Our goal is to work only with socially audited suppliers, increasing this number every year to at least 75% per 2025.

# Our CSR plan

The UN Sustainable Development Goals are the framework for our CSR plan. We have selected several subjects throughout the company that contribute to these SDG's and have created projects and actions to include all parts of the company. This way we can share our efforts and include everyone to realize our goals. Together we are creating a Positive Impact!

## Our Actions:

Recycled Claim Standard

# Certified Recycled Tech

The Recycled Claim Standard is an international, voluntary standard that sets requirements for thirdparty certification of recycled input and chain of custody. The shared goal of the standards is to increase the use of recycled materials.

## Why do you need RCS certification for items

This certification ensures that the identity of the recycled materials is maintained: from the recycler to the final product.

## When is RCS applied to an item?

RCS is the standard used when part of a product, but not the entire product has been made from recycled materials.

## Who makes the RCS certificate

The RCS certification is made by an appointed third party who has no business relation with anyone involved in the production chain of the product.

For more information about RCS visit the global union website:  
[www.certifications.controlunion.com/en](http://www.certifications.controlunion.com/en)

# Writing instruments

# Replaces up to 100 traditional wood pencils

Tree free

No sharpener needed

## Tree free infinity pencil

This Tree free infinity pencil replaces your traditional wooden pencil. Traditional wooden pencils write only up to around 200 metres, but this Tree free infinity pencil, has a writing length of up to around 20000 metres using a graphite tip to produce a graphite line. Not only does it write like a pencil, but the markings can be erased. It works by leaving a graphite line on paper just like a regular traditional wooden pencil but it wears down so slowly, that it should outlast up to 100 traditional wooden pencils!
